

What happens when a distracted driver runs into a distracted pedestrian?

No one wins!

**Stop the Talk.
Just Walk.**

**Injuries to pedestrians
using cell phones have
doubled in five years.
Step to the side to use
your phone—don't use
your cell phone while
you walk.**

Distracted Walking— Are you at risk?

While walking do you...
(Check all that apply.)

- Text your friends?
- Talk on your cell phone?
- Use headphones?
- Think you talk on the phone and watch traffic at the same time?
- Cross streets while using your phone?

If you checked even one box, you are at risk. On average, four pedestrians per day are treated in hospital emergency rooms for injuries related to cell phone use while walking.
